Vorwort.

Ich habe Volkssprache und Volksüberlieferungen der Grafschaft Mark zum Gegenstande meiner Forschungen gemacht und veröffentliche hier einen Theil meiner Ausbeute. Es geschieht besonders in der Absicht, meine Landsleute auf die Ueberlieferungen, welche unter ihnen gehen, aufmerksam zu machen, sie den Kreis derselben einigermaßen überblicken zu lassen und durch Erweckungen größerer Theilnahme*) für weitere Sammlungen zu gewinnen.

Ohne Zweifel werden diejenigen, welche unserer Mundart mächtig sind und Sinn haben für das eben so gemüthliche als verständige Wesen unserer Vorfahren, wie es sich in vielen von diesen Ueberlieferungen ausspricht, eine derartige kleine Sammlung willkommen heißen. Ihnen wird auch die derbe Natürlichkeit, welche manchen von unsern Sprichwörtern und Redensarten anklebt, nicht anstößig sein. Und ist diese Schrift, was sie sein will, ein kleines Bild

*) Dies mit Bezug auf das treffliche Werk: „Germaniens Völkerstimmen, herausgegeben von M. Firmenich," welches wenigstens unter den wohlhabenderen Markanern größere Theilnahme hätte finden sollen.

unſeres Volksgeiſtes, ſo durften ſolche Züge darin nicht fehlen.

Es thut den niedern Ständen unter uns Noth, daß der beſſere Theil des Stoffes, an welchem die Väter Gemüth, Phantaſie und Verſtand bildeten, wieder mehr in Umlauf geſetzt werde. Seit mehr als zwei Jahrhunderten iſt ein Losreißen des Volkes von angeſtammter Sprache, Ueberlieferungen, altehrwürdigen Sitten und Gebräuchen im Gange, und was in den letzten vierzig Jahren in dieſer Beziehung geſchehen iſt, wiegt alles Frühere weit auf. Es iſt nun an vielen Orten dahin gekommen, daß die Jugend der niederen Stände mit dünkelhaftem Pochen auf ihr zum Theil unfruchtbares und entbehrliches Wiſſen die ganz anders beſchaffene Bildung der Väter verachtet, — daß das Bauermädchen ſich ſchämt, ein Märchen zu erzählen, welches ſie von der Mutter lernte, — daß viele Bauerburſchen ſich etwas damit wiſſen, wenn ſie die heimathlichen Ueberlieferungen, deren ſie ſelbſt baar und bloß ſind, unnützen Plunder nennen. Wer aber die Kulturzuſtände der Vergangenheit mit denen der Gegenwart in etwa zu vergleichen im Stande iſt, wird zugeben müſſen, daß die Bildung der Alten in dem, was Hauptſache ſein muß, eine beſſere war. Wie vertraut lebten dieſe mit der ſie umgebenden Natur der Heimath! Während die Nachkommen auf einer Wieſe nichts weiter bemerken, als gutes und ſchlechtes Gras und nebenbei den Werth berechnen, kannten jene Alten die deutſchen Namen und den Gebrauch von Hunderten der dort wachſenden Kräuter und wußten, welche Ueberlieferungen ſich daran

knüpften. Jeder Vogel hatte für sie eine Sprache, — jeder Berg, jeder Ort seine Sage und oft mehr als eine. An diesen Stoffen, und vor Allem an Märchen, Fabeln, Liedern und Sprichwörtern, wie sie auf heimathlichem Boden gewachsen und durch Jahrhunderte gleichsam approbirt waren, bildete man Gemüth, Phantasie und Verstand.

Wie auch die Wissenschaften deutscher Sprache und deutschen Alterthums, namentlich die Kulturgeschichte und Mythologie, gefördert werden, wenn wir die Ueberreste unserer einst ohne Vergleich reicheren Volkssprache und Volksüberlieferungen sammeln, das sieht der Kundige aus einzelnen Parthien dieses Buches.

Zum Schlusse erlaube ich mir den Wunsch auszusprechen, daß auch in den Theilen der Grafschaft Mark, welche für dieses Schriftchen nichts beisteuerten, Hand an das Sammeln der Volksüberlieferungen und wichtigsten Sprachreste gelegt werden möge. Wer das thun wollte, würde aber mit der gewissenhaftesten Treue Alles genau so wieder zu geben haben, wie es im Volke umgeht. Oft ist gerade das anscheinend Unverständliche und Sinnlose für die Wissenschaft das Wichtigere. Viele Dunkelheiten werden von Kennern der alten Sprache und Sitten leicht aufgehellt, oder sie verschwinden, sobald Stücke desselben Inhalts aus verschiedenen Gegenden mit einander verglichen werden können. Nie möge man einer Sage Züge hinzufügen, die sie etwa verschönern oder dem Mangel an Zusammenhange abhelfen sollen.

Es ist sehr wünschenswerth, daß bald gesammelt werde, weil sonst schon in wenig Jahren Vieles un-

wiederbringlich verloren sein dürfte. Die wirklich sehr zähe und lebenskräftige Natur unserer Ueberlieferungen und alterthümlichen Gebräuche hindert nicht — wie die Sachen jetzt stehen —, daß mit jedem Greise, der zu Grabe getragen wird, auch ein Theil derselben erlischt. Noch zwar ist das vorhandene Material reich zu nennen, so wenig dessen auch sein mag in Vergleich mit dem, was — unzweifelhaft — ehedem da gewesen ist; aber es ruht größtentheils in dem Gedächtnisse älterer Leute. Mögen diese es aufzeichnen oder aufzeichnen lassen, der Presse anvertrauen und durch dieselbe der Nachwelt vermachen!

Bemerkung.

Die Länge des Vokals ist in der Regel aus dem folgenden einfachen Konsonanten zu erkennen; doch machen manche häufig vorkommenden einsylbigen Wörter z. B. ik, et, bat, in, met und viele Endungen davon Ausnahme. Das trübe A (oa) ist durch lateinisches a, sein Umlaut durch lateinisches æ ausgedrückt. Der Apostroph (') hinter u, ú, i bezeichnet Länge dieser Vokale und ihre Trennung von dem folgenden e.

1. Die Finger des Kindes werden angefaßt und benannt, wie folgt: Dümelinkskeu, fingerlinkskeu, lankmännken, swankmännken, klaine kappeditsmännken.

int hillige paradis.

IV. Thierlieder.

1. An die Schnecke.

Snagel (im) hus, kuem herut, ſup de ſaüte miälke ut!

2. An den Marienkäfer.

Hiärguots-haünken flüch op,
tüh den hogen hiemel 'rop,
brenk mi 'ne güllne ki'e met!

Auch im belgiſchen Kinderreime wird dieſer kleine Käfer aufgefordert, Gold zu bringen. Man halte dazu 1) den Namen Sunnenſchienken und die Meinung der Kinder, daß die Sonne den andern Tag nicht ſcheinen werde, wenn man eins tödte, — auch 2) daß für Gold und Sonne Ein Zeichen gebraucht wird, ſo wird die Be-

ziehung auf den Sonnencultus nicht zweifelhaft sein. Daß andere Käfer, z. B. Perremæner, wol in Bezug auf den Mondcultus standen, folgere ich aus dem Namen Mæner, der von Mane abzuleiten ist. Die Variante: flüch vör mines nabers hus, locke mi de brut herut, ist, wie der Reim zeigt, ursprünglich hochdeutsch und erinnert, wie der hochdeutsche Name des Käfers (Maria für Freija), daran, daß das Thierchen der Liebesgöttinn geweiht war.

3. An den Maikäfer.

Maikiäwe flüch!
din vader es im krich,
din moder es in pommerlant,
pommerlant es af ebrannt —
maikiäwe flüch!

4. An den Guckuck.

a. Kuckuck, sup en ai ut, friet de schale met, dann wärstu dick un fett!
b. Kuckuck schriäwe, bu lange sa'k noch liäwen?

So fragt man den Guckuck und zählt, wie oft er ruft. In andern Gegenden Westfalens sagt man für „schriäwe" besser „vam hiäwen."

5. An den Habicht.

Hawek hawek kükendaif, hiät sin var un mor nitt laif.

6. An's Huhn.

Tuk tuk tuk, min haüneken!
hat daüste in uesem huof?

8. An die Fledermaus. (Iſerlohn.)

4. Schäfchen verkaufen. (Hemer.)

Die Kinder setzen sich so nieder, daß das erste dem zweiten, das zweite dem dritten u. s. w. auf dem Schooße sitzt. Eins (der Käufer) geht umher, einen Stab in der Hand tragend, und singt:

Schæpken imme schote
vi laipen all te hope,
laipen in de wintergiärste
un fräten nes te biärste.
Inganf utganf —
hu hett de küenink van Engellant?

Der Käufer stellt sich darauf neben dem hintersten Kinde (dem Verkäufer) auf, berührt es mit seinem Stabe und fragt:

Hett i en schæpken te verkopen? — Ja. —
Es et ok fett? — Fett es et. —
Wat sall et kosten? — Twe daler. —
Hu hett et? — (Der Name.)

Nun geht der Käufer zu dem Genannten, faßt mit beiden Händen seinen Stab, stellt sich vor ihn und macht Faxen, um ihn zum Lachen zu bringen. Gelingt dies, so ist das Schäfchen gekauft.

Bemerkung. Auch Volksspiele ohne solche Formeln verdienten beschrieben zu werden. Wir haben deren auf dem Lande uralte, die sich leider hie und da schon verlieren. So wird z. B. das Slüffkenjagen unter dem märkischen Landvolke genau so gespielt, wie das engl. slipper-hunting, welches Goldsmith in seinem Vicar beschreibt. Bei manchen Spielen verrathen schon die Namen das Alter, z. B. Galgen-lesken (für Galgen-lesten), ein Kriegsspiel, in welchem die gemachten Gefangenen beim Galgen „lesten" d. i. aushalten, in Haft sitzen müssen.

5. Tanzreim.

X. Kinderreime bei beſondern Beſchäftigungen und Anläſſen.

1. Waldbeerenlied (Emperſtraße).

Tri tra trull,
min küörſken es vull,
latt us nu na huſe gan,
wa de klainen alle ſtan,
fraget ſe us:
Hett et ok de küörſſes vull?
Hela hela tri tra trull!

2. Spruch beim Baſtlöſen (Hemer).

Sippe ſappe ſunne —
min moer es 'ne nunne,
min vaer es 'n pape,
dä wolln en pipken maken,
dat woll 'ne nitt geraen;

Kättken laip den bom herop,
woll en bietken ſap halen;
da dat kättken wi'er quam,
was 'et pipken ute.
Pipkenut, hukkenkrut, hukkenkrut!

Die nacheinander folgenden Bemühungen von Jütte, Gerderut und Heſſe ſind ganz im Stile alter Segenſprüche, und wir dürfen darin Weſen der Mythologie vorausſetzen. Der Jütte klebt hier etwas Feindliches an. Es bezeichnet wol eine Rieſinn. In einem hieſigen Volksliede heißt es: da kikt ſiewen junge Jütten 'rut, und der Zuſammenhang fordert durchaus „Rieſen". Sünt-jütten-braüe iſt eine ſchlechte Brühe. Dat ſaſte hewwen op Sünt-jütten-

dach d. i. niemals, weil Jütte (als heidnischer Dämon) nicht unter den Kalenderheiligen stehen kann. Gerderut nimmt, wie sonst Süntegerderut, die Stelle einer gütigen Göttinn, vielleicht der Frikka ein. Peter Hesse, anderwärts de alle, de grise Hesse, scheint der Kriegsgott Hadu zu sein, wozu die Ausdrücke: du blinne Hesse! (Hadu war blind), hä slätt drop as en Hesse, trefflich passen würden. Der Uebergang von Hadu in Heß scheint mir auch in dem hiesigen Familiennamen Heßmer (Hadumari) Statt gefunden zu haben. Ich möchte endlich Hemer (urk. Hademare), wegen seines uralten Bergbaues, und unsere zahlreichen Haßloh auf Hadu beziehen, dann wäre der Berg Haßloh (jetzt Fröndenberg a. d. Ruhr), den die Sage (vgl. v. Steinen W.-Gesch.) als einen Sitz des tollsten Götzendienstes bezeichnet, gerade jenem Kriegsgotte geweiht gewesen.

3. Hirtenlieder.

a. Op der kall' Egge

da raüpet de huep:
bat es et hir guet!

b. Michele tirele —

c. Hirtenruf (Gegend von Lüdenscheid).

c. Das Loern der Hirten.

Hee loe loe loe lo-ee!

Die schon bei v. Steinen vorkommende Sage von einem altsächsischen Hirtengotte Loe ist nicht so ganz von der Hand zu weisen. Könnte es nicht Loki (Lohho) gewesen sein? Vgl. das Dänische: Locke treibt seine Geiße aus.

XI. Reime bei Gebräuchen, die sich an besondere Tage knüpfen.

1. Am Zimbertstage.

An diesem Tage (Donnerstag vor Fastnacht) war es auf einigen Höfen zu Halden bei Hagen Brauch, keine Arbeit zu verrichten, bei welcher „wuot runt genk", also namentlich nicht zu spinnen, zu dreschen u. dgl. Auf andern Höfen that man dieses, war aber pflichtig mit „Hetewigge" aufzuwarten. Jüngere Höfe kehrten sich weder an das Eine, noch an das Andere. Von den Höfen, wo Zimbert gefeiert wurde, zog das junge Volk Abends mit einem Spieß nach den alten Höfen, welche bewirthen mußten und sang:

Zimp zimp zimp —
gief dem armen Zimbert wuot,
latt 'ne nitt te lange stau,
he maut noch en hüsken widder gan.

Sobald sie aus den Häusern waren, goß man ihnen Eimer Wasser nach.

Die Zimbertsfeier ist ein Ueberrest der Verehrung der Göttinn Frikka (ahd. Frouwa), die den Beinamen Berhta, die Glänzende, führte. Dies ergibt sich zunächst wol aus dem Namen. Zimbert wird aus Sint-Berhta entstellt sein, da unsere Alten sint (sanct) auch von dem Dämonischen, Uebermenschlichen gebrauchten, so daß es selbst dem Teufel zustand. Eine weitere Bestätigung liegt in einem Mendenschen Reime, der als Zimbertspeise „knudeln un slackermann*)" d. i. Klöße und Fische, nennt. Dies sind aber Gerichte, die auch anderwärts am Berchtentage gefordert werden. Der wichtigste Grund für meine Annahme ist das Einstellen des Spinnens. (An der obern Lenne verkaufen die Weiber an diesem Tage den „Diesten".) Die Göttinn Fricka führt die Aufsicht über die Geschäfte der Frauen, liebt fleißige Spinnerinnen und verlangt, daß Alles abgesponnen sei, wenn sie mit dem Zimbertstage ihren winterlichen Umzug im Lande beschließt. Noch jetzt warnt man bei uns vor dem späten Spinnen mit dem Zusatze: Berhta met der blauerigen hant küemt süß dör't finster.

*) Slackern zappeln, vom Fische.

2. Auf S. Peterstag (Hemer).

An diesem Tage wird frühmorgens mit Hämmern an die Hausposten geklopft, was man das „Sünte-vuegel-jagen" nennt. Man giebt als Zweck an, „de hukken un slangen un feh-mollen*)" oder das Ungeziefer, oder die Ratten und Mäuse vertreiben zu wollen. Wer es unterläßt, heißt es auch, dem wird das Vieh erkranken. Bei diesem Klopfen wird gesprochen:

'rut 'rut, Sünte-vuegel!
Sünte-peter dai es kuemen,
Sünten-tigges küemet noch;
hai verbütt di hus un huof,
lant un sant,
lof un graß.

Bit tinte jar üm düen dach
fall di alle schelm de lange hals af.

Ga in de stenklippe!
da sastu inne sitten.
Ga in de stenkule!
da sastu in verfulen.
Ga na 'me Kluſenſten
un tebriek hals un ben!

Dieser in Westfalen viel verbreitete Gebrauch ist für einen Ueberrest des Winteraustreibens zu halten. Denn 1. an der obern Lenne weiß das Volk noch, daß dieser Gebrauch einen nahen Bezug auf den Winter habe und das Scheiden desselben bezeichne. 2. Gerade auf S. Petritag fällt der Schluß des harten Winters. Vgl. unsere Sprichw. Sünte-peter fällt de sne oppen heten sten. Lammerste mi, dann petre ik di d. i. behandelst Du mich schlecht vom Lambertstage an, dann verlasse ich auf S. Peter Deinen Dienst, sagt der Bauerknecht. Winter, leck mi im äse! siet de Altenæer op sünte-peter un smitt de hansken futt, men hä maut se vake noch wi'er krigen. 3. Neben anderen merkwürdigen Uebereinstimmungen, welche die Sprache und mythische Ueberlieferung unserer Mark mit dem Norden darbietet, dürfte auch Sünte-vuegel bestehen und sich am leichtesten aus einer Entstellung des Eddischen sut fugla d. i. Trauer der Vögel (poet. für Winter) begreifen.

*) Altf. feh bunt; also feh-molle bunter Molch.

3. Am ersten Mai (Iserlohner Landgemeinde).

Kalwer-quieken.

Am ersten Mai steht der Hirt mit „Krick" des Tages auf und geht nach einer Stelle des Berges, welche am frühesten von der Sonne beschienen wird. Dort wählt er dasjenige Vogelbeerbäumchen (Quiekenpuot) aus, auf welches die ersten Strahlen fallen und schneidet es ab. Das Abschneiden muß mit „Einem Ratz" geschehen, sonst ist es ein übles Zeichen. Ist er mit dem Bäumchen auf dem Hofe angekommen, so versammeln sich die Hausleute und Nachbarn. Die „Stärke", welche „gequickt" werden soll, wird auf den Düngerplatz geführt. Da schlägt sie der Hirt mit einem Zweige des Vogelbeerbaums auf das Kreuz und spricht:

Quiek quiek quiek —
brenk miälke in den strick!
De sap es in den biärken,
en namen kritt de stiärken.
Quiek quiek quiek —
brenk miälke in den strick!

Zum Zweiten schlägt er sie auf die Hüfte und sagt:

Quiek quiek quiek —
brenk miälke in den strick!
De sap küemt in de baüken!
'et los küemt op de aiken.
Quiek quiek quiek —
brenk miälke in den strick!

Zum Dritten schlägt er sie ans Euter und spricht:

Quiek quiek quiek —
brenk miälke in den strick!
Im namen der uiliken Graiten
(Goltblaume) sastu haiten.
Quiek quiek quiek —
brenk miälke in den strick!

Nachdem nun die Hausfrau ihre Stärke besehen hat, nimmt sie den Hirten mit ins Haus und beschenkt ihn mit Eiern. Die Gabe fällt aus, jenachdem das Thier gut geweidet worden ist. Mit den Schalen der verzehrten Eier, mit Butterblumen u. a. wird das aufgepflanzte Vogelbeerbäumchen verziert. Der Hirt thut sich etwas darauf zu gute, wenn er viele Eierschalen aufzuhängen hatte.

Der Vogelbeerbaum, wegen seiner üppigen Blätter Quicke bei uns genannt, ist noch jetzt den Fischern und Schiffern Norwegens ein heiliger Baum, von welchem sie etwas in ihren Fahrzeugen haben müssen.

4. Maigruß.

Am ersten Mai, oder wann das erste Grün von Laubhölzern zu haben ist, kommen Kinder mit grünen Zweigen (Mai) in die Häuser und sprechen:

Guen dach, guen dach, guen dach int hus!
Hi breng'k ink den ersten mai int hus.
De erste mai es wuol so guet;
iek hädde so gärne 'ne nate fuet.

Darauf werden sie begossen. — Dieses Begießen ist wol ein Ueberrest heidnischer Lustrationen. Hatten doch unsere heidnischen Vorfahren selbst eine Art Wassertaufe!

5. Pfingstbraut.

Auf Pfingsten führen zwei Mädchen ein drittes (de pinksbrut), welches mit Blumen bekränzt ist, von einem Hause zum andern und singen:

'rut 'rut!
da kuem-vi met der brut,
de brut dä es van Niggeruo'e,
drüm mach se gärne aierduo'er;
aierduo'er int molkenfatt,
da wärt brümer un brut van satt.

Sie werden darauf mit Eiern beschenkt.

6. Pfingstgebräuche der Hirten.

a. An der obern Lenne.

Der Hirt, welcher am ersten Pfingsttage zuletzt treibt, bekommt den Namen Pinkestfoß, Pinkesthamel, Snaellübber. Man sagt ihm, he möch 'ne snael lübben, auch wird ihm folgender Spottreim gesungen:

Pinkesthamel berrebuck (Bettseicher)
maifoß dickhut
wost du nimmermär
unger der dicken decke 'rut.

b. Im Dortmundischen.

Am Pfingstabende nageln die Hirten einander die Stallthüren zu, weil Keiner am Pfingstmorgen der letzte auf der Hude sein will. Den letzten schimpft man Beddebuek, setzt ihn auf ein Holz, de schrae iesel genannt, macht ihn bunt und zieht dann mit ihm umher. Bei dieser Gelegenheit werden Eier gesammelt. Man singt:

Gose gose gise —
aier in de kipe,
aier in den biädelsack,
dann hessi de gantse wiäke wat.
Moer klopp op 'et nest,
klopp us nitt te sige!
en half stige batt us nitt,
siewen en twintich schatt us nitt,
latt us nitt te lange stan,
vi maüt noch en hüsken födder gan.

c. Spottreim auf den Pfingstfuchs.

Pinkestfoß allene
met dinem schewen bene,
met dinem schewen, schiälen kopp;
wann annerlü na kiärken gatt,
stes du pinkstfoß op.

7. Woher der Ausdruck Pfingstfuchs?

Noch im vorigen Jahrhundert herrschte bei uns auf dem Lande der Gebrauch, einen gefangenen oder erlegten Fuchs, Marder, Iltis u. dgl. bei den Nachbarn umherzutragen und dafür Eier zu sammeln. Wahrscheinlich aber sorgte man dafür, vorzugsweise auf Pfingsten eine solche Eiersammlung halten zu können. Den zu diesem Zwecke verwendeten Fuchs denke ich mir lebend und am Schwanze verstümmelt. Daraus würde sich die Redensart: He schraiet as en pinkstfoß und folgender Reim (aus der Gegend von Hagen) erklären:

Foß foß foß —
lech dinen stiärt oppen kloß!
Eck well hauen,
du saß blauen, —
foß foß foß!

8. Martinslieder.

a. Obgleich der Martinsabend in Iserlohn nicht (mehr?) gefeiert wird, findet sich daselbst folgendes Liedchen:

Sünte-Merts vüegelken
dat hiät so'n rot rot küegelken
dat flüget all so hoge,
all üöwer den Rhin,
all üöwer den Rhin. —
dat äppelken maut gegiäten sin,
dat nüetken maut geknappet sin,
dat küörweken maut verbrannt werden.

Kuegel heißt Kappe, Haube; vgl. imen-kuegel. Unser Reim nennt also deutlich den rothhaubigen Schwarzspecht (picus martius), der als Siegesvogel unsere Vorfahren manchmal an und über den Rhein geführt haben mag. Unter Sünte-Merts mag der deutsche Mars, der Kriegsgott Tius (Ziu) zu verstehen und die Beziehung auf S. Martinus eine spätere sein. Tius lebt in unseren Tüßbergen (bei Deilinghofen, bei Dahle) fort, und ist wol mit dem Jüdoto, der nach der Sage in der Nähe des Tüßbergs verehrt wurde, einer und derselbe. Ueber Jodüte (= Jüdoto) berichtet Bernh. Witte Hist. Westph. p. 291.

Des Korbverbrennens am Martinsabende geschieht auch in Fischart's Gargantua Erwähnung: „O Martein, Martein, der Korb muß verbrennt sein." Noch jetzt soll dieser Gebrauch bei Dortrecht vorkommen.

b. von Schwelm.

Märten es en gyet mann,
dä us braf wat giewen kann
äppel unde biären,

Junge frau, junge frau!
latt us nich te lange stan,

Der wæren mall bu'erslü, en mann un ſine frau, dä hänn kain kint. Da höllen ſe ueſen Hiärguot an, Hai ſoll 'ne doch en kint giewen, un wann et ok nitt grötter wær as en dümken. Da gaff iäne ueſe Hiärguot en klain klain kinneken, dat laiten ſe peterken döpen; men will et nitt grötter was as en dümken, ſo hedden ſe 't meſtlik Dümlingesken. Ás dümlink iätlike jar alt was, drap et ſik ens, dat ſin mor dem var en bueter na 'me felle ſchikken woll un nümmes=en hadde, dai et hen brengen konn. Da ſach dümlink: Mömme, dat well iek wuol daun. Sai antwarde: Dat kaß du nitt, min füenken; bu woß du üöwer de wagentran kuemen? Dümlink awwer ſach; Da ſuorget men nitt, mömme! iek legge 't bueter as brügge der üöwer. Hai der hen. Derwile dat ſin var 't bueter at, ſatt hai ſik dem piärre int ar, flodde un raip, bu et ſik jüſt paſſede:

Hott, har, jüe! un plaügede. Met diäm quämen drai hären vörbi, dai ſægen, dat de piärre gengen un fraügen den bur: Nu ſegget ens, bai driwet u de piärre? — Bu! dat daüt min ſüenken, dä ſittet 'me piärre im ar, beſchedde ſe de bur. Middelerwile quam dümlink taum viörſchin un gonk ſin var op de ſchuller ſitten. Da wollen iän de hären gärne kopen. Men de bur hadde nienen ſinn der tau, bit intleſte dat iäm dümlink int ar fiſpelde: Daut et men, tatte! iek ſin doch balle wi'er bi u. — Nu krech 'ne enen van de hären för duſent daler. Dai woll 'ne in de taſke ſtiäken, men dat let dümlink nitt. Latt mi op u'em haue ſitten! ſach he. Dat geſchach. As ſe en ſtrek futt etrocken wæren, raip dümlink: Jek maut mall 'runner! iek maut mall 'runner! — De här ſach: Dau et oppen haut! du arr en vuegel. — Men dümlink woll par-tu herunner, un de här dä em ſinen willen. As he dal was, ſprank hä in'n roggenſtücke un verhudde ſik in 'me muſehuol, ſo dat de här 'ne nitt wi'erſinnen konn. Met diäm was et nacht waren. Da quämen drai ſpitsbauwen, dai üöwerlächten, bu ſe 'me buern de käſe afſtiälen wollen. Dümlink harde dat un raip: Riämt mi ok met! — De kärls antwarden: Bai büß du, un ba büß du? — Hai: Jek ſin Dümlink un ſitte im muſehuol. — Da dächten ſe: Halt! diän könn-vi guet bruken un nämen 'ne met. Op dat quämen ſe vüör 'n keller, un dümlink moch dör't flüetelsluok 'rin krupen. As hai imme keller was, dä hai 't finſter uopen un raip: He! wellt it grote adder klaine käſe? (Let ſtiälen was iäm nien ärnſt.) — Da laipen de kärls, dat gieſte bat hiäſte. Dümlink awwer redde ſik ut'm keller op de diäle und krop in'n klehop. Den annern muorgen quam de maget üm te foern, pock dümlink met 'me klawer op un ſmet 'ne innen kautrüoch. Da hiät 'ne de kau met eſluoken. As de maget nu quam, üm te melken, raip he ut der kau: „ſtripp ſtrapp ſtrull! es de emmer noch nitt vull?" — Da wor de maget gans verfiärt, laip int hus un ſach: Frau, ueſer kau es wuot anedan. — Der twedden maget un der frau paſſerde dat ſelftige. Da ſach de mann: Dann maü-vi de kau ſlachten! — Dat dän ſe un ſmieten den panßen op de miſtefalle. Diän krech ſik en foß un frat 'ne met ſammt'm dümlink op. Da raip dümlink ut'm foſſe: Foß lop! foß lop! ſe ſit ächter di. — De foß laip, dat iäm de klawen klapperden, un dümlink moch ſik vör lachen den buk hallen. Intleſte raip he: Foß!

Da raip dümlink: Schaitet awwer men nitt, slatt 'ne dot! iek, dümlink, sitte im fosse. — Dat dän se dann of un hülpen iäm ut'm fosse. Sin var was awwer fro, dat he 'ne wir hadde un woll 'ne nu för kain gelt mär verkopen.

Dieses Märchen geht in vielfachen Abänderungen unter uns um. Eine von dem Gegebenen sehr abweichende, roh-witzige Form enthält folgenden Zug: Däumling muß in einen Fleischerladen kriechen. Er spürt Eßlust, sucht nach Würsten, findet aber nur eine. Die höhlt er theilweise aus und pfeift am Ende vor Vergnügen. Das hört der Schlächter und eilt in den Laden. Däumling weiß kein besseres Versteck, als eben die ausgehöhlte Wurst. Gleich darauf wird die Wurst an einen Bauer verkauft, der sie in die Tasche steckt.

XV. Fabeln.

1. Der Bock und der Wolf. (Hemer.)

En Bock stont mall op 'ner klaren bieke un drunk. Da sach hai sine groten hærne imme waterspaigel un sach: Ha! wann nu de Wulf men quäme, diän soß du mall krigen. — Men de wulf stont jüst ächter iäme un raip! He, kärlken! bat kü'ers du da? — Da kek sik de Bock vergüset üm un sach: Min beste här, bat siet de bock bim drunke nitt! (Vgl. XX, 46.)

2. Die Ringeltaube. (Gegend von Hagen.)

In der ersten tit as uese Hiärguot de vüegel schapen hadde, gäfften sik de mesten farts ant nesten. Alle annern wären all feddich, da hadde de Ringelduwe noch nitt anefangen. Se floch hir hen un da hen un besach sik den annern vüegeln ere arbet. Kain nest poß er, bit se dat van 'r Ekster sant. Da sach se tau 'r ekster: Nichte, dinet

kann mi gefallen. Woſte mi nitt en bietken ter hant gan un wiſen mi, bu du dat maket hiäs. — De hännige ekſter floch met un halp er den buom leggen. As dai feddich was, ſach de ringelduwe: Ah, nu wet ek et all! dat es ja ne lichtfeddige ſake. — Guet, ſach de ekſter, daut allene! un floch futt. De duwe lach nu twarens noch en par ſpricke derbi, mär en öörntlik neſt brach ſe nü te ſtanne. Drüm hett de ringelduwen noch ümmer ſo'n ellendich neſt, dat me ſunne, mane un ſtärne derdüör ſaihen kann.

3. Die Königswahl der Vögel. (Gegend von Hagen.)

Ens quämen de Vüegel binen, üm unner ſik enen taum küeninge te kaiſen. Et verduchte allen am beſten te ſin, wann ſe te hope en flüech in de höchte makeden, bai dann am höggeſten quäme, diän wollen ſe krönen. En teken wärt giewen un ſe niämt ſik op. Doch balle küemt de ene üm den annern wir herunner. De adler allene blitt noch am ſtigen. Et leſte kann ok dä nitt mär un lätt ſik wir dal. Da ſaiht ſe op ens en vüegelken, dat flüget noch högger, as hai kuemen was. Mär dat dat nicks as bedraigerigge was un dat et dem adler omme ſtiärte ſtäten un ſik bit nu reſtet hadde, dat was den vüegeln kapp un klar. Se ſätten den ſchelm in'n muſchuol un ſtällten de Ule as wächter derfüör, bit ſe utmaket hänn, bat widders met em geſchaihen ſoll. Doch de ule ſlaip in, un de gefangene flüchtede ſik un verhudde ſik tüſken de nieteln. Drüm hett he Nietelküemk. As en de vüegel terna afhalen wollen, was he futt. Sidder diär tit ſchiämt ſik de ule ſo, dat ſe ſik nü mär am dage ſaihen lätt; ok ſiet me insglike, wann bai nitt ſinnt, bat he huopet hadde: Da hiät 'ne ule ſtäten.

4. Wie der Fuchs den Wolf Fiſche fangen lehrt. (Hemer.)

Et was winterdach un ſo kalt, dat de lüöker, dä me int is hochte, in kuort wi'er tau früeſen. Da quam dem Foſſe, dä omme felle herümme ſtrek, de Wulf in de maüte. Se kü'erden van düet un van dat. Et leſte vertalde de foß ſinem vadder ok, dat he ſo vake fiſke iäten könn, as et iäm men lüſtede. De wulf frauch: Ba kriſtu dann de fiske? — Dat we'k di ſeggen, antwarde de foß; da genten bim buernhuowe es en dik, da ſint vull fiſke inne. — Nu

woll de ſmächterige wulf ok wieten, bu me dä dann ſönge. Kuem men met der hen! ſach de foß, ik well et di gau lären. — As ſe bi dem dike wæren, wes hä iäm en huol, dat düör't is maket was, un ſach: Hir halt dinen ſtiärt in! dann kuemt de fiſke un bitet ſik faſte, un du kanns ſe lichtfeddige heruttrecken. Min wulf dä dat. As hai en wilken da ſtan hadde, wor et iäm duoch ſo kallerich, dat hä trekken woll. Ne ne! ſach de foß; noch en lück gedult! ik ſaihe ſe all kuemen. — De wulf holl dicks. As de foß gloff, dat et tit wær, raip hä: Nu tüh! De wulf trock, bat hä im balge konn, awwer ſtiärt un fiſke wollen nitt kuemen; dann de ſtiärt was faſte fruoren, un de fiſke ſäten ſtille omme grunne. Treck noch härder, vadder wulf, et ſint viel derane! ſach de ſchelm vam foſſe. — Et badde nitt. No dann! raip de roe met lachen, ik ſaihe wuol, du hiäs hülpe nödich. Wachte en bietken! ik well den bu'er raupen. Met diäm laip he na'me huowe. De bu'er quam met ſinen lü'en un gaff ſik ant diärsken. De wulf toch in docsängeſten ſo harde, dat he nu twarens loß quam, awwer ſinen ſtiärt half te panne ſitten lait.

XVI. Sagen und Mythen.

1. Der Mann im Monde. (Gegend von Lüdenſcheid.)

Et was mal en mann, dai woll ſtiälen, mä de mane ſchen un was iäm im wiäge. Da verflaukede hai de mane un ſachte: Woß du wiäch! As ueſe Hiärguot dat har, gaff hai iäme de wal, entwedder in der ſunne te verbriänen, awwer (oder) in der mane te verfraiſen. Da lait ſik de mann in de mane ſetten.

2. Feuriger Drache. (Landhauſen.)

En Hiäwenbrant (hiärbrant) flüget wuol mal in'n bu'ernhus un kann dann jar un dach op der holwe liggen un na der tit noch 'et hus anſtiäken.

3. Die Milchstraße.

Sie heißt bei uns Wiärstrate wegen ihres vermeintlichen Einflusses auf die Witterung (XIX, 15.), Hiälwiäch, Hielwiäch angeblich ihrer Helle wegen, aber richtiger wol, als der Weg, den die Seelen zur Hölle (Helle) ziehen (XVI, 26.), Köllsche strate, weil sie den Wallfahrern den Weg nach Köln zeigte; doch wurde auf die Frage: Bahiär schriwet sik düese name? auch Folgendes geantwortet: Van der tit hiär, as me de Hugenotten in Frankrik dot makét hiät. Da hiät uese Hiärguot den armen lü'en düese strate an den hiäwen satt, üm dat se den wiäch van Paris öwer Köllen int Osten biäter finnen konnen.

4. Zwerghalter.

All ens finnt me de har in der piärremane gans wunnerlik inen eknüestert. Dat hett de twiärke dan, un me naümet so wuot en Twiärkhaller.

Vergl. das englische to halter, verstricken.

5. Der Zwerg mit der Aehre. (Landhausen.)

En bur quam ens op sine diäle, da sach hai en Twiärk, dat jüst op der ledder stont un na der hille berop stech. Dat klaine männeken hadde en roggenar opper schuller un mechtede, as wann hai 'n gefærliken driäch te sliepen hädde. Dem bur quam dat putsich vüör. Bat der swiärder, sách he, mechtes du unner sösk 'me are! Farts lait dat twiärk 'et ar fallen un redde sik futt. Dat ar lach bit den annern muorgen op der diäle, dann dürsken se 't met un et quämen fif schiepel roggen herut. Da mainde dann doch de bur: Dat dank di der düwel, dat de klaine kärl mechtede!

Twiärk heißt auch Taumellolch, lolium temulentum; vgl. Alp und Alpranke.

ſchwarz. Urſprünglich bezeichnete Elf einen Lichtgeiſt, was ſich auch durch eine Lüdenſcheider Redensart beſtätigt. Dort bedeutet: et es oulf, es iſt heiteres, trocknes Wetter. Vergl. das lateiniſche albus, ölp bei Hans Sachs und ouphes bei Shakſpeare.

7. Rieſen. (Hemer.)

Omme Wirbiärge bi Altena un omme Gacksbiärge bi Sümmern wuenden ärdages Hünen. Dai böcken te hope un gäfften ſik, wann et tit was inteſchaiten, en teken met ſchrappen am backtruoge. Ens drap et ſik, dat dai vam Gacksbiärge nachts ſik am bollen kraſſede. De annere barde dat un gloffte, düet wær 'et teken. Hä pock diärümme ſine broe op un laip name Gacksbiärge, funt awwer ſinen karnuten noch daipe im ſlape.

In gans allen ti'en wuende ok en Hüne te Oewen-Hiämer. Wann dai ut Ulenhuofs ſprink drank, ſatt hä den enen faut int Bockeloh un den annern oppen Perik.

De kiärſpelskiärke te Iſerlohn ſtammet noch ut dem haidendume. Aerdages ſitt ok de Hünen 'rin 'egan. Dai hänn 'ne gans grote parte, da hett ſe na der tit en grot finſter van emaket.

8. Die Schon-Holden. (Gegend von Lüdenſcheid.)

Wann ärdages en bur na Hiärſche (Herſcheid) na kiärken wiäſt was, lange im wertshuſe ſuopen hadde un erſt late awents na hus genk, pöſſen iäm de Schonholden op. Hä mochte dann midden annen ſchacht pakken, diän ſai tüſchen ſik hann. So tühen ſe 'ne düör'n dik. Na hiär laiten ſe'ne lopen.

Eme weere, dai ik wet nitt bat verplerert hadde, klopveden ok mall twe nachts an de düör. De wert, in der mainunge et wären gäſte, ſtont ſo utem berre op un dä de düör uopen. Mä et wären twe Schon-holden, dä 'ne kriegen, an den ſchacht dänn un ok düör 'n dik tühen.

Vielleicht ſind hier die beiden Holden, die Göttinn Fricka (Frouwa), Vorſteherinn der Ehen, und die Liebesgöttinn Fria (Freya) gemeint. Sie handeln wenigſtens ſehr im Intereſſe der armen Eheweiber, wenn ſie die zu lange in den Schenken weilenden Männer der glimpflichen Züchtigung des kalten Bades unterwerfen.

Man denkt sich die Schon-Holden im Allgemeinen als riesenhafte Wesen. Die sprichwörtliche Redensart: dat sint rechte schon-holden (wahre Strauchdiebe und Schnapphähne) könnte später aus Mißverstand der Sage hervorgegangen sein.

9. Die weiße Jungfrau. (Hemer).

Th., en mann ut Hiämer, küemt ens late in der nacht van Hüeklingsen herop. Hai niemt sinen wiäch dör de eken-allee, ba all ens üm middernacht 'ne Witte-Juffer get un söchtet. Se was mi of düetmall da. Th. well iär utwiken, men dat gerätt nitt. Get hai rechts, sai of; draiget hai sik links, sai detselftige. Intleste stet se vüör iäm. Hai gripet sik en hiärte un fraget, bat se iäm woll. Da hält se 'ne üm Guodes willen an, hai soll se erlösen. Hai siet, wann hä dat köun, ja; se soll iäm ens seggen, bat dertau nödich wær. Da siet sai: Widders nicks, as dat J mi in'r nacht (dä sai iäm naümet) hir afhalt un draimall üm de alle kiärke driäget.*) Bai awwer sin wart nitt hell, dat was uese Th. Da küemt de witte juffer in'r nacht vör sin hus am Ebberge un kloppet an. Hä stet op un kiket dör't finster. Nu hält sai iäm vüör, dat hai nit dan hädde, bat hai iär luowede. Se biddet 'ne noch ens, he soll et nu daun. Awwer, ne. Da get se af un siet: Nu sall U'e frau vergan as en kolstrunk un J söllt of nitt te gnaden kuemen. — Sine frau es an der aftiärunge stuorwen, un hai hiät van Hiämer futt mocht un es verunglücket.

10. Hirmin. (Hemer.)

Von Hiärmen d. i. Hirmin (nach Grimm wahrscheinlich ein kriegerisch dargestellter Wodan) findet sich bei uns, außer dem Reime Hiärmen sla diärmen u. s. w. Folgendes: Du mains of, uese Hiärguot hedde Hiärmen. Ne! he hett laiwe här. Der Sinn dieser sprichwörtlichen Redensart ist: Du denkst und handelst nicht christlich, sondern heidnisch. Wir pflegen damit übertriebene, unverschämte Forderungen zurückzuweisen. Vgl. dat es 'n haidengelt, eine übermäßige Summe. — Anderweitiger Ge-

brauch des Wortes hiärmen. Von einem großen Kerle ſagen wir: dat es en hiärmen; von Jemandem, der ſehr müde iſt: es hiärmen bi di? hiät di hiärmen in der plage? — Kiärſpels-hiärmen heißt die dickſte Blutwurſt; bummelhiärmen ſchilt der Bauer ſein Pferd; hiärmen ſchlechtweg iſt ſo viel als ſchiet. Man bedient ſich alſo des Worts theils in der ihm urſprünglichen Bedeutung „groß," theils um etwas Feindſeliges, oder Verächtliches zu bezeichnen.

11. Springwurzel. (Hemer.)

Et ſöllt ärdages ſpitsbauwen wiäſt ſin, dä alle flüöter ane unmaße uopen maken konnen. Dat dä awwer, ſe hänn 'ne Sprinkwuortel. Enen was der ok wiäſt, dä hadde ſo 'ne wuortel am finger faſte ſitten. So aſſe me'n ris oppen puot ſettet un anwaſſen lätt, ſo hadde hai ſik 'n finger ſpallen un de wuortel der op erieſen.

Bu kriegen ſe dann ſo 'ne wuortel? — Ba dai te hewwen es, dat wet allene de Graünſpecht. Drüm ſaüket me dat bomluok, ba ſöok enen ſin neſt hiät. In düet huol ſlätt me 'n pal. Dann flüget de ſpecht futt un ſaüket 'ne ſprinkwuortel, will hai dat luok nitt anners uopen maken kann. Middelerwile ſall me 'n roen ſudden unner den bom leggen. De ſpecht küemt met der wuortel un hält ſe an 't bomluok. Farts ſpringet de pal herut. Will he awwer de wuortel nümmes-en günnt, ſo lätt he ſe op den roen ſudden fallen, in der mainunge, dat wær en für un ſe ſoll der inne verbriänen. Op düeſe art un wiſe kritt me de ſprinkwuortel.

12. Die einſtürzende Brücke.

Unner ener Brügge harde me ens raupen: De tit es da, wær de mann men da! — Süh, da küemt op emnal en bur heran gelopen, met 'me haue in der hant und in der gröttſten haſt. So dra at hai op der brügge es, ſtüörtet ſe inen.

Fillerte, ahd. vivaltra, bezeichnet einen kleinen Schmetterling.

14. Der Meineidige. (Hemer.)

En kärl, dai 'n falsken Et swuoren hadde, genk van Deilinghuowen na Braukse un nam sinen wiäch düör de iärlen-bräuke. Da kamme sine fautstappen noch ümmer saihen; dann et wässet nu un nümmer en grasspirken der oppe.

Man sagt von dem Meineidigen: 'et gras verdröget iäm unner den fäuten.

15. Der Gränzsteinverrücker. (Hemer.)

Hier und da heißen die Irrlichter Fuorenhüpper und sollen die Seelen Solcher sein, welche Gränzsteine verrückt haben.

Op 'me felle was 'et nitt richtich. Me har da nachts ümmer raupen: Ba sa'k 'ne laten? ba sa'k 'ne laten? — Den lü'en aisede 't, wann se da hiär göngen. En mal moch ok bai late da vüörbi, dai hadde den gueden infall dem fuorenhüpper te antwarden: Ba du 'ne kriegen hiäs! — Damet quam de geist ter ruhe.

16. Die Here mit den Schnecken. (Gegend von Lüdenscheid.)

Et was mall 'ne Häckse, dä hadde im köllschen lanne en tropp Sniäle huolet un woll dä iärem naber op den roggen driwen. Mä de roggen was in Guodes namen säget. Diärüm wollen de sniäle der nitt bliwen, un sai moch se met op iären egenen niämen.

17. Der Hexenritt auf der Häckselbank. (Gegend von Hagen.)

En forsni'er belu'erde mall 'ne Häckse un woll et iär na maken. He sat op siner snibank, tippede in dat pöttken met der häcksensalwe un sach den sprüek: „Stipp in, stipp ut, taum schuotsten herut" — Mär anplaß nu te seggen:

„üöwer alle hiegen un tüne!“ ſach hai: „düör alle hiegen un tüne!“ — So dra as dat ſpruoken was, floch he met ſiner bank dör den ſchuotſten un dann dör hiegen un büske, dat hut un har der ane hangen bliewen. Intleſte quam he op me krütswiäge an. Da ſtonnen de häckſen, lacheden un raipen: Nu ſaiht mall an! da küemt ok ueſe foerſni'er op ſiner ſnibank angeri'en.

18. Die geizige Frau.

Et was mall 'ne rike frau, dä was ſo griddich, dat ſe armen lü'en nicks van diäm gunnde, bat op iärem diske üöwerblef. De maget moch dat alle int drankfatt adder op den ſpaülſten ſchüdden. Men düſe derne was guet för arme lü un hadde ſe anlett, middages vör'n ſpaülſten te kuemen un ſik te krigen, bat ſe düörſlaiten lait. De ſpaülſten was dann vüörhiär ganś raine ſchü'ert. De rike frau ſtarf, un me ſpuor ſe balle am ſuegetruoge ſpoken tüſken den ſüegen. As iär mann dat harde, lait he 'n pater kuemen, dä dem geſte te ruhe helpen ſoll. Dai pater makede ſine cerimonien un frauch den geſt. Da rekede ſai der frau en timpen vam vüördauke. Diän pock de geſt un verſwant, awwer de timpen was verbrannt.

19. Die Ducke-mor.

Eine Stunde von Iſerlohn iſt der Frönsperter Berg und an demſelben eine Stelle, wo drei Pfade zuſammentreffen. Dort ſtand ſonſt eine ehrwürdige Eiche, und der Ort heißt „an der Ducke-mor (auch wol duotke-mor)“. Es ſoll daſelbſt gar nicht geheuer ſein, und Mancher will wunderliche Stimmen (ſo'n affünnerlik gelute) vernommen haben. Wer nun des Weges ziehen muß, der bricht ein Reis ab und legt es an der Ducke-mor nieder. Das iſt Brauch bis auf den heutigen Tag, und man findet dort in der Regel einen Haufen Reiſig, der auf dieſe Weiſe hingekommen iſt. Wer das Hinlegen unterlaſſe, glaubt man, müſſe irre gehen, ſo gut ſei er nicht, oder geſchehe dieſes nicht, ſo widerfahre ihm etwas Schlimme-

res. Mancher legt vielleicht auch sein Reischen hin und denkt: Batt et nitt, et schatt ok nitt!

Vorzeiten wurden von Sundwig, Westig und Hemer aus Processionen hieher gehalten. Vielleicht stand vor der Reformation eine Kapelle oder ein Heiligenhäuschen unweit des heiligen Baumes. Man sieht wenigstens noch eine Stelle, wo wol so etwas gestanden haben kann. Daher dürfte Dueke-mor (auch durke-mor gesprochen) aus dem altsächsischen diurlica modar entstanden sein und wenigstens in späterer Zeit die ehrwürdige Mutter Maria bezeichnet haben.

In uralten Zeiten, so geht die Sage, hat man an dieser Stelle einen tollen Götzendienst getrieben. Damit kein Unberufener hin käme, wurde der Ort graunhaft gemacht. Nach Hemer hin stand der Schrekkenſten, nach Westig zu der Düwelspost.

20. Verwünschtes Geld. (Hemer.)

Na jaren wæren mall iätlike blagen bi Ihmert am kauhaüen un makeden sik taum titwerdrif en spielken. As sik middelerwile 'et veh im biärge verloven hadde, höllen se op met spielen un gengen, üm et wi'er te saüken. Da funt dann 'ne klaine derne en wann, dai was vull van blenkendem Gelle. Se woll jüst tautassen, da raip et ächter iär: He he! de kaü in der hawer. — Se kek sik üm, un van dem gelle was nitt mär te hæren of te saihen.

Sieker hadde de derne nitt wust, dat verwünsket gelt verswinnet, wamme sik ümdraiget, är me en meß, en fürstal arr so wuot drop smieten hiät.

21. Kostbare Steine. (Westig.)

En mal gengen twe früembe männkes üöwer den Nambiärch. En junge, dä da jüst de kaüe hodde, smet met stenern na sinen besten. Enen van den früembden buor so'nen sten op, bekek 'ne und sach: Van den stenern, bamet hir de blagen na den kaüen smütt, es enen mär wärt as so 'ne kau.

22. Der Schatz im Raffenberge. (Geg. von Hagen.)

Tüschen Hagen un Limburg es de Rachenbiärch, da stont erdages 'ne buorch. Se wiset iäm da en pütt, da sall, as de segge es, en Schatt inne versunken liggen.

En mal gengen lü hen, dä wollen diän büören. Se spüörden ok op dem grunne vamme pütte den kietel met dem gelle. Se gäfften sik deran, 'ne herut te trecken. Mär so as he högger stech, wor he swögger un swögger. Da sach enen: Badder, lassi mall resten! So dra as he dat sach, sprank 'ne hucke in dat pütt. De kietel sank wi'er un was sint diäm nitt mär te finnen.

23. Eckesey. (Hemer.)

Büör vielen jaren es mall de Pest hir in der Mark wiäst, dä hiät so'n spiel lü met ennomen, dat düörper un stiäe sär na liech wæren. Da es dann ok enmall en mann un 'ne frau na Hagen kuemen. Dai hiät bai fraget: Buviel lü sint in inkem duorpe noch am liäwen? — Da hiät de mann esacht: Eck un sai. Diärümme hett dat duorp Eckesey.

24. Die Nacht-Mar.

Wann 't Mat küemt üm biän te ri'en adder wi'er afget, so hært sik dat an, as of bai 'n naten sack üöwer de ärde sliepede. Sinen wiäch niemt et dör't slüetelsluok. Drüm kann et nitt herin kuemen, wamme den slüetel in der düör stiäken lätt. Et kann iäm ok nitt ankuemen, wamme 'n slüetel met 'me krütse im kamme bi sik hiät; ok nitt, wamme den staul, ba me et leste op stäten hiät, van der sti'e schüwet, arr wann me de schau verkart vör't bedde settet.

25. Der Werwolf. (Gegend von Ergste.)

All lange bänn se bi Järgeste 'n Wulf espuort, dä af un tau den bu'ern de beste teret, men nümmes wuste recht te seggen, ba Höltink sine huorst hadde. Op ens was he da, un op ens wi'er futt. Da vertellt dat süenken van 'me gewissen H. te Järgeste (na der tit Wulf H. hett) dat sin mor dem var, wann he na hus quäme, 'ne molle vör den munt höll, dann möch sik de var üöwergiewen un et quäme gelt un allerhant saken taum vöörschin. Nu was et den Järgestern summer twiwel, dat dai en verbüntniß met dem Düwel maket hädde un ok wuol as Warwulf ümgenge. Se brächten 'ne vör gericht un dat befal, he soll de waterprowe aflegen. Da raip he den Düwel an, he soll iäm doch en par müelstene an de bene hangen, üm dat he oppen

grunt genge. Men de Düwel hatte sinen jucks met iäm un brach en par nateln. Da moch he swemmen un wor schüllich befunnen. Op der wulwes-wiese unner 'me ekenbome hett se sine aske begrawen. —

War-wulf bedeutet Mann-wolf. Der Glaube, daß Menschen sich in Wölfe verwandeln könnten, war sonst in der Mark sehr verbreitet. Damit hängt wol zusammen, daß man noch zu Anfange des vorigen Jahrhunderts den selten erscheinenden Wolf mit Höltink (Hölzing, Holzhund) ehrend anrief, wie mir alte Leute erzählt haben.

26. Der Hellweg. (Ispey.)

De Hiälwiäch es de wiäch tau'r Helle wiäst. De Helle lach awwer wit van hir im Narden, op giessit van dem groten water. Da hiät de Düwel op 'r lu'er stan, met'me ruder inner hant, üm de selen an te niämen, dai iäm sine Grote-mor brachte. Hai plach se ächterna te versöpen. All ens es iäm awwer de tit en lück lank ewaren. As he nu ok enmall rechte langewile hatt hiät, un sine alle et leste wi'er met wuot anekuemen es, hiät hai iär 't ruder hen esmieten un sik futt emaket. Da hiät he dann mall recht fett elachet, dat hai klaüker wiäst es, as sine grotemoer. Dat es sösk en lachen wiäst, dat me noch bit op düen dach siet: He lachet as en hiärtebock. Hiärtebock hett awwer de düwel, will 'ne sine alle oppen Hiärtebiärch, d. e. Blocksbiärch, bannet hiät, diärümme dat hai se so dran ekriegen hadde.

Die Lage der Hölle im Norden, das Ueberfahren der Seelen, der Teufel und seine Mutter, der gebundene Teufel sind echt heidnische Vorstellungen unseres Alterthums.

27. S. Einhardsbrunnen.

In Altena gatt se op Ostermuorgen na 'me Kluſenſpringe un füllet sik water, dat sall dann besunners guet för de ogen sin.

Da bat de fromme mann uesen Hiärguot, hai soll iäm doch düese plage afniämen. Da lait uese Hiärguot farts dat sprink ut dem biärge hervüörgan.

28. Das Mädchen von Lünschede und die Schlange.

Zwischen Iserlohn und Altena, näher bei der letztern Stadt, ist im Gebirge eine schöne Fläche, das Lünscheid geheißen, auf welcher ehedem das adlige Geschlecht von Lünschede, genannt von Altena, ein Schloß gehabt haben soll, ohne daß jedoch von Ueberbleibseln desselben noch eine Spur vorhanden ist. An diesen Ort knüpft sich folgende märchenhafte Volkssage.

In gans allen ti'en wuende oppem Lünschede en bu'er, dai hadde 'ne entsige dochter un was blautarem. Diärümme sach hai tau iär, as se tien jar alt was: „Min kint, du liß bi mi men hunger un kummer, ga un saük di bi gueden lü'en 'n denst. Uese Hiärguot si met di!" Damet dä hai iär en stücke brot un en krükoken miälke in de hant un genk noch en entken wiäges met bit op de Lünscheder Hai'e, dann karde hai üm. Dat miäken genk nu allene vüöran, bit se in'n ensamen grunt quam. Da satt se sik dal, üm en bietken te posen, te iäten un te drinken. Se hadde der noch nitt lange siäten, da quam 'ne fine Slange op se an un sach: „Dernken, gief mi en lück met van dinem bro'e un van diner miälke!" — „„Van hiärten gärne! — sach 'et miäken — wann du men satt dervan wärs un mi noch en bietken üöwer läß, dat iek et uthallen kann, bit iek bi lüe kueme."" — „O, iek bruke nitt viel!" antwarde de slange un nibbelde an dem bro'e un drank en drüppel miälke. Dann sach se: „Nu sin 't satt. Jek danke ok." — „„Och, — sach 'et miäken — es der wuot te danken! me kann ja gar nitt saihen, dat du giäten un drunken hiäs."" — „Sall iek dann maren wi'er kuemen? Et wær mi en groten gefallen! un iek brächte ok gärne ent van minen döchterkes met!" sach de slange. — „„Ja, men driste, wann't ok drai sint."" — „Guet, guet! iek hewwe gerade drai döchter, dä well iek dann alle metbrengen; awwer du maus ok din wart hallen un hir bliwen." — „„Verlatt di drop!"" — Dat miäken blef dai nacht imme dale. Se harde wülwe in der nægede hülen, men se wek nitt van der sti'e. Et gaff en schrecklich duenerwiär, awwer se hell ut; dann se hadde iär wart derop egiewen. Den annern dach in der selftigen stunne quam de fine slange wi'er. Se drauch nu oppem koppe 'ne güllene krone, dä was besatt met funkelnden stenen. Met iär quämen drai klaine slangen, ok sin un met güllenen kronen.

Dat miäken gaff 'ne alle te iäten van iärem bro'e un te drinken van iärer miälke; men dat brot wor kum klenner un der miälke kum wenniger. Na diäm dän ſik de ſlangen fröntlik bedanken, un de alle ſach: „Nu, guede dernken, well vi di wuot giewen.“ Op dat krüepen ſe en füör en dem miäken op de ſlippe un ſchüdden iär de güllenen kronen innen vüördauk. As dat geſchaihen was, ſach de alle: „Nu, dernken, biäs du un din var wuot te liäwen, ga men na hus un kuem tinte jar üm düeſe tit wi'er hir hen un brenk ues brot un miälke!“ — Dat dä 'et miäken ſiewen jar ächter-en un krech jedes mal ſo viel kronen as de erſte raiſe. Jär var was nu en riken mann un buggede ſik en prächtich fluot.

4. Gegen das Rothe beim Rindvieh.

Kau-blaut sta!
Ge'e ga!
